

Table of Contents

List of Tables	ix
List of Figures	xi
Preface	1
The View from Above	1
Notes to the Reader	2
CHAPTER 1: Studying Terrestrial Habitat Utilization by <i>Ambystoma</i> Salamanders With Radiotelemetry and Drift Fence Arrays: A Comparison	3
Introduction	3
Materials and Methods	4
Results	9
Discussion	17
CHAPTER 2: Spatial and Temporal Patterns of Habitat Utilization in A Population of Spotted Salamanders	21
Introduction	21
Materials and Methods	22
Results	30
Discussion	85
CHAPTER 3: Terrestrial Habitat Availability Limits The Distribution and Abundance of Spotted Salamanders in a Suburban Landscape	103
Introduction	103
Methodology	106
Results	124
Discussion	147
CHAPTER 4: Upland Habitat Requirements of Wetlands-Dependent Wildlife: Conservation Dilemmas and Opportunities	157
Introduction	157
Spotted Salamander Population Declines in an Urbanizing Landscape	158
The Vulnerability of the Vernal Pool Amphibian Community to Upland Habitat Destruction	159
The Ecological Significance of Upland Habitat Use by Vernal Pool Amphibians	163
Vernal Pool Amphibians and Regulatory Wetlands Buffer Zones	167
Upland Habitat Requirements of Wetlands-Dependent Wildlife:A Dilemma Demanding Creative Solutions	168
Literature Cited	173

List of Tables

Spotted Salamander Microhabitat Use	12
Salamander Trespass Rates	16
Correcting Distance Class Distributions for Trespass	19
Estimation of Adult Population Size	33
Yearly Demographic Data	34
Sizes of Breeding Spotted Salamanders	36
Logistic Regression Model of Larval Presence/Absence	48
Linear Regression Model of Recruitment	55
Northwards Bias in Post-Breeding Dispersal	56
Association of Adult and Progeny Dispersal Patterns	59
Dispersal of Juveniles Relative to Surrounding Habitat	62
Poisson Regression Model of Distance Dispersed by Metamorphs	67
Linear Regression Model of Adult Captures at Brown's Pond	79
Linear Regression Model of Adult Captures at Pond WHI	81
Terrestrial Habitat Quality Gradients of Spotted Salamanders	98
Variables Measured at 201 Potential Breeding Sites	113
Principal Components of Terrestrial Habitat Variables	120
Comparison of Ponds With and Without Spotted Salamander Eggs	125
Egg Mass Presence/Absence vs. Pond Hydroperiod	127
Egg Mass Presence/Absence vs. Surrounding Soil Drainage Class	129
Logistic Regression Analysis of Salamander Presence/Absence	131
Linear Regression Model of Egg Mass Abundance in All Ponds	135
Correlations of Egg Mass Abundance and Pond and Upland Forest Area	141
Linear Regression Models for Egg Mass Abundance in Ponds of Different Sizes	142
Comparison of Utilized Ponds with/Without Viable Salamander Populations	146
Predicted Effects of Upland Forest Destruction on Large Salamander Populations	151
Migration Distances of Vernal Pool-Breeding Amphibians	160
Amphibian Biomass in Brown's Pond Forest	166

List of Figures

Drift Fence Array, Brown's Pond	7
Diagram of Trespass Types	14
Locations of Population Scale Study Sites	24
Diagram of Brown's Pond Drift Fence Array	27
Phenogram of Salamander Life Stages	31
Locations of Egg Masses	38
Diagram of Egg Mass vs Adult Immigration Correlation	40
Adult Captures vs. Egg Mass Locations	41
Surface/Contour Plot of Larval Distribution	42
Relative Distribution of Eggs and Larvae throughout Aquatic Life Stages	43
Larval Density vs. Pond Depth	45
Larval Density vs. North-South Positions	46
Larval Density vs. Proximity to Emergent Vegetation	47
Metamorph Weight vs. Date of Emergence	50
Variance in Metamorph Weight vs. Date of Emergence	51
Weight Change of Juveniles After Metamorphosis	52
Recruitment vs. Number of Females Breeding	53
Mean Dispersal Angles of 8 <i>Ambystoma</i> Cohorts	57
Adult vs. Progeny Mean Dispersal Angles	60
Circular Histograms of Adult and Metamorph Dispersal Patterns	61
Dispersal Distance of Juvenile Salamanders	64
Metamorph Weight vs. Distance Dispersed	66
Salamander Density vs. Distance from Pond	68
Movements of Adult Salamanders During Autumn Migration	72
Dispersal Distance of Adult Salamanders	74
Captures of Adults vs. Proximity of Trap to North	76
Captures of Adults vs. Distance from Trap to Forest Edge	78
Surface Plot of Adult Capture Frequency	80
Location of 201 Potential Breeding Sites in Concord Study Area	107
1993 vs. 1994 Egg Mass Counts	110
Relative Cumulative Frequency Plot of Egg Mass Counts	133
Relative Cumulative Frequency Plot of Egg Mass Counts vs. Pond Size	134
Egg Mass Count vs. Pond Area	137
Egg Mass Count vs. Surrounding Upland Forest Area	138
Surface Plot of Egg Mass Count vs. Pond and Forest Area (view 1)	139
Surface Plot of Egg Mass Count vs. Pond and Forest Area (view 2)	140
Relative Importance of Terrestrial Habitat in Predicting Egg Mass Count vs. Pond Area	143
